Forecast for Monday 24 Aug 2020

Weather: Cloudy during the early hours with occasional showers developing, these locally heavy and with a low risk of thunder, and possibly merging to give some longer spells of rain in places. The showers will ease not long after dawn and clear eastwards through the morning leaving largely dry conditions with sunny spells developing. Dry with sunny spells in the afternoon and dry during the evening with partly cloudy skies.

Chance of cloud free mountain/hill tops above 600m: 40% at first with areas of cloud near 700m and with patches of cloud as low as 500m in showers. Improving to 100% by mid-morning as cloud breaks and lifts clear of the summits.

Visibility: Good at first, but moderate and even occasionally poor in showers with views nearby hills appearing misty or briefly obscured. Becoming generally very good by midday with clear views of even distant hills.

Meteorologist's View

Nothing further to add.

Recent rainfall: measured at Neuadd: altitude 353m

Recorded at	Last 24 hours:	Last 48 hours:	Last 72 hours:
14:00 on Sun 23 Aug 2020	6.2mm	22.8mm	43.2mm

Forecast for Tuesday 25 Aug 2020

Weather: Outbreaks of rain will arrive during the early hours of Tuesday becoming heavy and persistent at times and with a low risk of hail and thunder for a time mid-morning, The rain may turn showery at times through the afternoon, with a few drier interludes, but more persistent and heavy rain will arrive for the evening, Very strong winds with gales developing, and possibly severe gales over the summits in the afternoon and evening.

Maximum wind: Southwest 40-45mph gust 55-60mph.

Chance of cloud free mountain/hill tops above 600m: 100% at first but deteriorating 10% or less as the rain arrives as extensive cloud develops nearer 400m. Perhaps improving to 70% at times in the afternoon as cloud lifts and occasionally breaks to nearer 800m, but falling to 10% in the evening as cloud lowers back to 400-500m.

Visibility: Very good initially, but becoming moderate to poor in the rain. Some brief improvements to locally good in the afternoon, but deteriorating to moderate at best in the evening rain. Often very poor on the higher routes with even nearby landmarks obscured.

Temperature: **Valleys:** Plus 12 Celsius becoming Plus 17 Celsius.
At 600m: Plus 12 Celsius.
Freezing level: Above the summits.
